### PIAAC—Problem Solving in a Technology-Rich Environment

One of the interesting facets of PIAAC is the notion that we need adults who can solve problems in a technology-rich environment. How that will play out is yet to be determined; however, David Rosen and Ann Harris conducted a roundtable here in Washington last month to begin to sort it out. Below is the notice of that meeting with a link to their report. Feel free to share it with those in your state who you have thinking about this area.

March 12, 2014

We're writing to follow-up on the round table discussion regarding *Digital Literacy and Problem Solving in a Technology-Rich Environment* that was hosted by Teknimedia Corporation at the Washington Ren Hotel on February 19th. Please [click here](#) to view the results of the discussion prepared by David Rosen as well as other important background information pertinent to the discussion. Feel free to share this with your colleagues as desired.

David has also submitted a shorter, online report on the results of the round table to the Office of Technical and Adult Education as part of the U.S. Department of Education national engagement process.

If you have any questions, don't hesitate to contact us.

Best Regards,

David Rosen ([djrosen123@gmail.com](mailto:djrosen123@gmail.com)) and Ann Harris ([aharris@teknimedia.com](mailto:aharris@teknimedia.com))
